

Dear friends,

My name is Wan. I am a student in the Smile project. I have been studying with Michael for seven months. I like his teaching very much. He is a very funny teacher. He always makes the students in the class laughing. It makes me happy to study English with him. I love his teaching a lot.

Thank you very much for the flashlight. I was very excited when Michael gave me a flashlight. It's really amazing because it's very different from a flashlight in Laos, and it's very useful for people like me because when the electricity went out at night, I can still see anything that I would like to do. You know, the electricity in Laos sometimes goes out about 5 or 10 minutes, but not very often. If you have more flashlights, you can donate to the Smile project so that we can share them to the villages that don't have electricity. There are many villages in the countryside that don't have electricity. So if you can donate more, it will help the villagers in the countryside a lot.

Many thanks for the flashlight, finally,
may the buddha bless you.

Kinds regards,

Wan.
